

Portable XGA Projector. Bright, Light, and Portable

PJD5234L

The ViewSonic® PJD5234L is the ideal projector in the office or on the campus. It delivers amazingly clear images with 3000 ANSI lumens, 15000:1 contrast ratio and XGA 1024x768 native solution. The PJD5234L is packed with features including HDMI®, multiple PC and video input options, 1.1x optical zoom, keystone correction, 3D Blu-ray ready, support HD signal, integrated speaker and DynamicEco™. With DynamicEco™ technology, presenters can put the projector in "standby" mode by reducing brightness down to 30% when they need to shift audience's focus or when the projector is not in use without restarting the projector. Filter-less design and energy-saving Eco-mode provide for virtually zero maintenance and product reliability. Slim design, 3.7" high with only 4.7 lbs, makes the PJD5234L the perfect projector for tabletop use or ceiling mounting in both classrooms and corporate offices.

of 15,000:1 (w/ DynamicEco), the PJD5234L is guaranteed to be bright and shine in classrooms and conference rooms.

Long Lamp Life up to 10,000 Hours

The new advanced lamp technology extends the lamp life up to 10,000 hours* and saves on maintenance costs.

3D Blu-ray Ready with HDMI

HDMI delivers the highest picture and sound quality without degradation. Equipped with the latest HDMI, ViewSonic's PJD5234L projector can now display 3D images directly from 3D Blu-ray® players. It's perfect for connecting to any HDMI-enabled devices from PCs, laptops, tablets, media players to Blu-ray® DVD players.

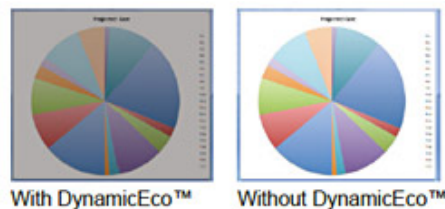

BrilliantColor™ Technology

ViewSonic's PJD5234L projector with BrilliantColor technology features multi-color processing to produce stunning, vibrant colors. Unlike other technologies such as LCD which use just 3 primary colors to produce the image, the PJD5234L uses up to 6 separate colors. The sophisticated 6-segment color wheel enhances the yellow color performance that is the key to accurate and vivid color reproduction. With multi-color processing, colors are

quality you can trust and superior color performance you can count on after thousands of hours of usage. Built on DLP technology, the ViewSonic PJD5234L projector virtually eliminates image degradation known as color decay – yellow/faded tint that LCD projectors may develop after extended use. Even after years of use, the PJD5234L is still producing a stunning, sharp image that lasts.

Take Control of Audience's Focus

With the DynamicEco button on the remote, take command of presentations by dimming the screen image up to 70%. The projector will also auto activate DynamicEco when the unit is not in use. When DynamicEco is activated, the lamp's power consumption is significantly reduced – a great energy-saving design for low total cost of ownership (TCO).

Maintenance Free

ViewSonic's PJD5234L projector features a filter-less design. Unlike LCD projectors that require the user to clean, sometimes to replace, filters after every 100 to 300 hours of operation, ViewSonic's PJD5234L projector is filter-less, eliminating the need for filter cleaning or filter replacement. This saves you significant maintenance dollars and labor over the projector's lifespan, and lowers your total cost of ownership (TCO).
